OLIVER ALEXANDER ASCENCIO PLEITEZ

Cybersecurity | Software Development | Applied AI | Technical Project Coordination
Santa Ana, El Salvador | +503 7539-8164 | oliver.a.ascencio@gmail.com
linkedin.com/in/oliver-ascencio | oliver-ascencio.wuju.dev

PROFESSIONAL PROFILE

Software Development Engineering student and WUJU co-founder with practical experience in secure application development, database design, requirements analysis and coordination of technical projects. Completed the academic requirements for a university-level technical degree in Cybersecurity; graduation pending. Work includes access control for a point-of-sale system and Python-based analytical initiatives in hydrological and agricultural monitoring. Career interests include cybersecurity strategy, compliance and risk, secure software development, applied AI and long-term security architecture.

EDUCATION

Software Development Engineering (degree in progress) | Universidad Católica de El Salvador (UNICAES) 2025–2029 (expected)

Second-year student, Santa Ana campus; software development, databases, application architecture and project-based work.

Técnico Superior Universitario (TSU) in Cybersecurity | ESIT / MINED 2024–2025

31 of 31 courses completed; 64 of 64 academic credit units earned; community service completed. Graduation pending. Program endorsed by INFOTEC, Mexico.

Technical Vocational High School Diploma | Centro Escolar INSA Completed

Technology Infrastructure and IT Services. Honors diploma: first place in the specialization.

PROFESSIONAL AND PROJECT EXPERIENCE

Co-founder and Technical Lead | WUJU 2025–Present

- Coordinate a six-person technical team engaged in software, data and applied research initiatives; collaborate with a broader multidisciplinary project group.
- Gather client and stakeholder requirements, define scope with project teams, document technical decisions and track deliverables using agile practices.
- Contribute to architecture and technology selection for CuencaOS and Terrivo, as well as internal guidelines for research integrity, responsible data handling and project review.

Software Developer — Point-of-Sale System (Community Service) | Pizza Brava / ESIT Nov 2025–Mar 2026

- Designed and implemented role-based access control (RBAC) for cashier, kitchen and administrator accounts, applying least-privilege principles.
- Designed the PostgreSQL database and synchronization with Firestore; developed application functionality using React and Node.js.
- Collected requirements from the business owner and trained staff in the use of the application.

Co-founder and Project Developer | TuGuíaSV Jun 2024–Present

- Coordinated a four-person team developing and prototyping a geolocation-based platform for tourism and local information in El Salvador.
- Worked with DigitalOcean, Cloudflare CDN and SendGrid in supporting platform services and infrastructure.
- Presented the project at Feria Eureka 2024 and InspiraSTEM 2025.

SELECTED TECHNICAL PROJECTS

CuencaOS / Akhet | WUJU Labs In development

- Hydrological monitoring initiative involving rainfall and water-level data, connected sensors, basin mapping, risk indicators and predictive analysis to support decisions.
- Develop Python components for Akhet, the analytical engine, and contribute to data documentation, model validation research and human review of risk-related outputs.
- Presented at InspiraSTEM 2026 and StartupSTEM 2026.

Terrivo / Atria | WUJU In development

- Agricultural monitoring initiative for livestock and crops, combining RFID records, farm history, environmental data and imagery.
- Develop Python-based data components for Atria and explore analytical models for predictions and operational recommendations, subject to human review.

TECHNICAL AND PROFESSIONAL SKILLS

Cybersecurity: Hands-on role-based access control, least privilege and secure application design; academic foundations in OWASP Top 10, network security, cryptography, incident response and ethical hacking.

Programming and software: Python, Java, Spring Boot, JavaScript, Node.js, React, C#, SQL and basic PHP; Git and GitHub.

Databases and infrastructure: PostgreSQL, MySQL, SQLite, Firestore, DigitalOcean, Cloudflare, SendGrid; AWS fundamentals and Google Cloud coursework.

Artificial intelligence and data: Python-based analytics, introductory machine learning, responsible AI, Vertex AI Studio, Transformers/BERT, data lakes, data warehouses and analytics concepts.

Collaboration and project delivery: Requirements analysis, external stakeholder communication, team coordination, documentation, task tracking, agile/Scrum practices, ITIL fundamentals and user training.

AI-assisted development tools: GPT, Claude, Gemini and Cursor for prototyping, analysis and software development support.

COURSES, BOOTCAMPS AND PROFESSIONAL DEVELOPMENT

- **Full Stack Junior Bootcamp (FSJ34)** — Kodigo; 2026; in progress
- **Scrum Fundamentals and the Scrum Master Role** — Fundación Caprile; 16-hour course; enrolled, scheduled to begin 13 October 2026
- **Cybersecurity Fundamentals with CompTIA Security** — ESIT / AECID; 20 hours; 2025
- **ITIL Standards** — ESIT / AECID; 20 hours; 2025
- **AWS Cloud Fundamentals** — ESIT / AECID; 20 hours; 2025
- **Java Developer Bootcamp** — Kodigo; diploma awarded March 2025
- **Startup Development** — UNICAES; 12 hours; February 2025
- **Artificial Intelligence Bootcamp** — MINED; 40 hours; November 2024
- **Programming Bootcamp, cohort 2** — MINED; 70 hours; May 2024
- **Google Cloud / Coursera learning** — Google Cloud / Coursera; completed June 2024; topics include AI and machine learning, responsible AI, Vertex AI Studio, Transformers/BERT, analytics, data lakes and data warehouses
- **Entrepreneurship** — Aprendo; 2024
- **Bitcoin** — Node Nation / INSA; 2024
- **Basic Salvadoran Sign Language** — ITCA-FEPADE / Fundación Helen Keller; 15 hours; 2023

AWARDS, RECOGNITION AND TECHNICAL ACTIVITIES

- **StartupSTEM 2026 finalist — CuencaOS** — UNICAES; one of five finalists selected from 37 submissions
- **National Robotics Championship TechLive 2024** — El Salvador; third place
- **TECH FEST 2023 Student Merit Diploma** — Automated Greenhouse project; technical student recognition
- **First place in technical specialization** — Centro Escolar INSA; honors diploma, Technology Infrastructure and IT Services
- **InspiraSTEM 2026** — CuencaOS; scientific poster presentation and technical dissemination
- **InspiraSTEM 2025** — TuGuíaSV; poster presentation
- **Feria Eureka 2024** — CONACYT El Salvador; TuGuíaSV project presentation
- **AI Labs / Cursor buildathons** — Technical events; collaborative rapid prototyping and applied AI activities
- **The Next Craft — Full Day Hackathon** — Technical event; intensive collaborative problem-solving and solution prototyping
